## FULLY VACCINATED VS. UP TO DATE

The policy on exposure to COVID-19 is based on whether you are **fully vaccinated** or **up to date** with your vaccines.

The CDC considers you **up to date** with your COVID-19 vaccines when you have received **all** doses in the primary series and all boosters recommended for you, when eligible. The CDC considers you **fully vaccinated** if you have completed your initial vaccination series.

In Nevada, if you are fully vaccinated but not up to date, you will need to isolate and test under the existing guidelines if you are exposed. In this case, if you test positive, you are entitled to COVID-19 leave. If you are fully vaccinated AND up to date you will **not** have to test or isolate if you are exposed (unless you are symptomatic).

Take advantage of the onsite vaccination events!
